Hi Greg,

Attached is your draft summary with suggested changes.

You have a lot of personal pronoun usage. Perhaps you should state that you are the author, if not obvious.

Rick

Subject: Draft summary of CASA/EPA meeting

Hi all – Please find below my draft summary of our recent meeting during the CASA DC Conference.

Please let me know if you have edits, corrections, comments, etc. I am never quite sure how much detail to include so would appreciate your thoughts. I will add language for my introductory overview of California issues and biosolids management. I will also either add to the end of this a summary of our afternoon pesticide meeting with OPP or do that as a separate summary (your preference would be appreciated). Thanks very much - Greg
